

Toni

Toni is deeply committed to holistic child development and believes that nurturing curiosity, creativity, emotional well-being, and strong foundational learning in the early years is essential to lifelong success. She is a strong advocate for reading, purposeful play, and building environments where children feel safe, inspired, and empowered to grow. Toni brings experience working alongside community health workers, health posts, and in designing model health facilities, particularly spaces focused on maternal and child health.

Toni holds academic training in Medical and Social Anthropology, Global Health, and Health Policy, along with a certificate in Early Childhood Development Global Strategies for Implementation from Harvard University and is currently pursuing an MBA in AI. She also brings experience in UX/UI and research, which strengthens her ability to design thoughtful, child-centered learning environments and programs that respond to the real needs of children, parents, and educators.
